COOPERATIVE EXTENSION WORK IN AGRICULTURE AND HOME ECONOMICS

County agent work

AUG 30 1921

U. S. DEPARTMENT OF AGRICULTURE  
AND STATE AGRICULTURAL COLLEGES  
COOPERATING

STATES RELATIONS SERVICE  
OFFICE OF EXTENSION WORK NORTH AND WEST  
WASHINGTON, D. C.

## THIS LOOKS GOOD

EXTENSION PROJECTS INVOLVING COOPERATION BETWEEN THE EXTENSION SPECIALISTS, COUNTY AGENT, AND LOCAL COOPERATORS.

County agent leaders and assistant leaders will be interested in the attached sheet of projects developed by committees of county agents and extension specialists of the Kansas State Agricultural College.

We are enabled to send this to county agent leaders through the courtesy of Mr. Karl Knaus, county agent leader for Kansas. These projects are well worked out and should do much to bring about increased co-ordination of the work of the various extension agencies and a larger amount of service to the field.

1917

1. The first part of the report deals with the general situation of the cooperative movement in the United States. It is found that the movement has made considerable progress since 1914, and that the number of cooperatives has increased from 1,000 to 1,500. The report also discusses the various types of cooperatives, such as those for the production and distribution of goods, and those for the provision of services. It is found that the cooperative movement is most advanced in the West, and that it is also making considerable progress in the South and Middle West. The report concludes that the cooperative movement is a promising one, and that it has the potential to play a significant role in the development of the United States.
